

Nitish Kumar

Amritsar, Punjab, India — +91 9905748818 — nitishsingh1401@gmail.com

LinkedIn — GitHub — Portfolio

Professional Summary

Data Analyst skilled in Python, SQL, Power BI, and Excel, with experience in cleaning, transforming, and analyzing structured datasets to solve business problems. Built dashboards and performed analysis on customer behavior, revenue trends, and product performance to support data-driven decisions.

Technical Skills

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, EDA, Statistics

Visualization: Power BI, Excel, Matplotlib, Seaborn

Databases: MySQL, PostgreSQL

Tools: GitHub, VS Code, Jupyter Notebook, Google Colab

Projects

Fake News Detection System — Python, NLP, Machine Learning

GitHub

- Developed a Fake News Detection system to classify news articles as real or fake.
- Performed data cleaning and text preprocessing using Python libraries.
- Applied TF-IDF feature extraction to convert text into numerical features.
- Built and trained a Logistic Regression model for news classification.
- Evaluated model performance using accuracy and classification metrics.
- Implemented the solution using Pandas, NumPy, Scikit-learn, and NLP techniques.

Customer Shopping Behavior Analysis — Excel, Python, Pandas, SQL, Power BI

GitHub

- Analyzed a dataset of 3,900 customer records with 18 features including demographics, purchase details, and customer behavior.
- Performed customer segmentation, revenue trend analysis, and product performance evaluation.
- Created dashboards and visualizations to understand customer preferences and buying patterns.
- Generated insights to support data-driven business decisions.

Dynamic Weather & Air Quality Insights Dashboard — Power BI, DAX, Power Query, API

GitHub

- Developed an interactive Power BI dashboard using live weather API data to monitor weather and air quality across multiple cities.
- Connected a live API to retrieve real-time weather information and environmental data.
- Created custom DAX measures and KPIs to analyze Temperature, Humidity, Wind Speed, Visibility, UV Index, and Air Quality Index (AQI).
- Designed dynamic reports with city-wise filtering and cross-filtering for comparative weather analysis.
- Built a 7-day weather forecast visualization and chance of rain analysis to support better decision-making.
- Developed AQI indicators with health alerts to provide meaningful environmental insights.
- Tools Used: Power BI, DAX, Power Query, REST API, Excel.

Education

I.K. Gujral Punjab Technical University (IKGPTU)

Bachelor of Technology (B.Tech) – Computer Science and Engineering

Aug 2023 – May 2027

Punjab, India

Bihar School Examination Board (BSEB)

Class XII (Intermediate)

2020 – 2022

Bihar, India

Certifications & Achievements

- Data Analysis with Python (Provided by DAO101EN, IBM)
- Microsoft Power Platform Suite
- Power BI , Advanced Excel (Provided by AOSC Technologies India Pvt. Ltd.) – 2 Months
- Web Development (HTML, CSS, JavaScript)
- Graphic Designing
- Python Programming (Provided by AOSC Technologies India Pvt. Ltd.) – 45 Days
- Advanced Excel Reporting Techniques for Data Science (provided by L&T EduTech)
